COMPOSITES

Castlegrass RANGE

Castlegrass offers not only a cost effective and time saving alternative to natural grass but also keeps the high quality effect of a naturally laid turf. Castlegrass can be used on both commercial and residential properties. Artificial grass is fast becoming the perfect solution for gardens throughout the UK due to the time and money saved after it has been installed. This is due to virtually no maintenance being required after the grass has been laid. This saves time and money on cutting, feeding, watering and numerous other chores that its counterpart natural grass has.

The grass shown below is our full range and the pictures show the difference between each of our 4 types of grass.

SAMPLES

It is very difficult to demonstrate the quality of Castlegrass through a website or brochure so we are more than happy to provide samples of our full range of artificial grass free of charge. Furthermore, we operate with a 24hour courier service so delivery time is kept to a minimum. To arrange for a sample to be sent please contact us via phone or email.
